DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1, 5, 6, 8, 12, 13, and 16 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The cited claims do not meet the requirement for producing a useful, concrete, and tangible result. All of the remaining claims detail an operation of either performing the update or signaling a completion of an update. This operation would allow the useful, concrete, and tangible result of updating applications. The claims indicated above, determines when the update should occur, i.e. setting of parameters, through a GUI mechanism, etc. The cited claims do not perform the updating of the application and thus do not produce a useful, concrete, and tangible result.

Claims 5-7 and 12-14 are non-statutory subject matter because the claims are directed to functional material of a program without a claimed statutory computer storage medium or executing on a computer system. Applicant is directed to M.P.E.P. 2106 wherein a functional program (deployer) being absent of the storage medium or computer system to realize the functionality is non-statutory. Page 3, lines 10-12 of the specification alludes to the deployer being software only.

Claim Rejections - 35 USC § 112

2. Claims 1, 5, 6, 8, 12, 13, and 16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. As outlined above the cited claims are intended to coordinate an update to an application running on an application server however, there is no language in the claims of performing the update. Therefore, the claims do not distinctly claim and particularly point out a system, method, etc. for enabling updates to applications because the updates are not performed.

3. Claims 1, 3, 5, 8, 10 and 12 recite the limitation "~~the~~ change to the one or more applications" and "~~the~~ timing of the installation of the update" in the amended portions of the claims. There is insufficient antecedent basis for this limitation in the claim.

Allowable Subject Matter

4. Claims 3, 4, 10, 11 and 17-21 have allowable subject matter upon correcting the 112 issue.

5. Claims 2, 9 and 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims and correcting the 112 issue.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 2195
